

Measuring Your Kitchen Guidelines

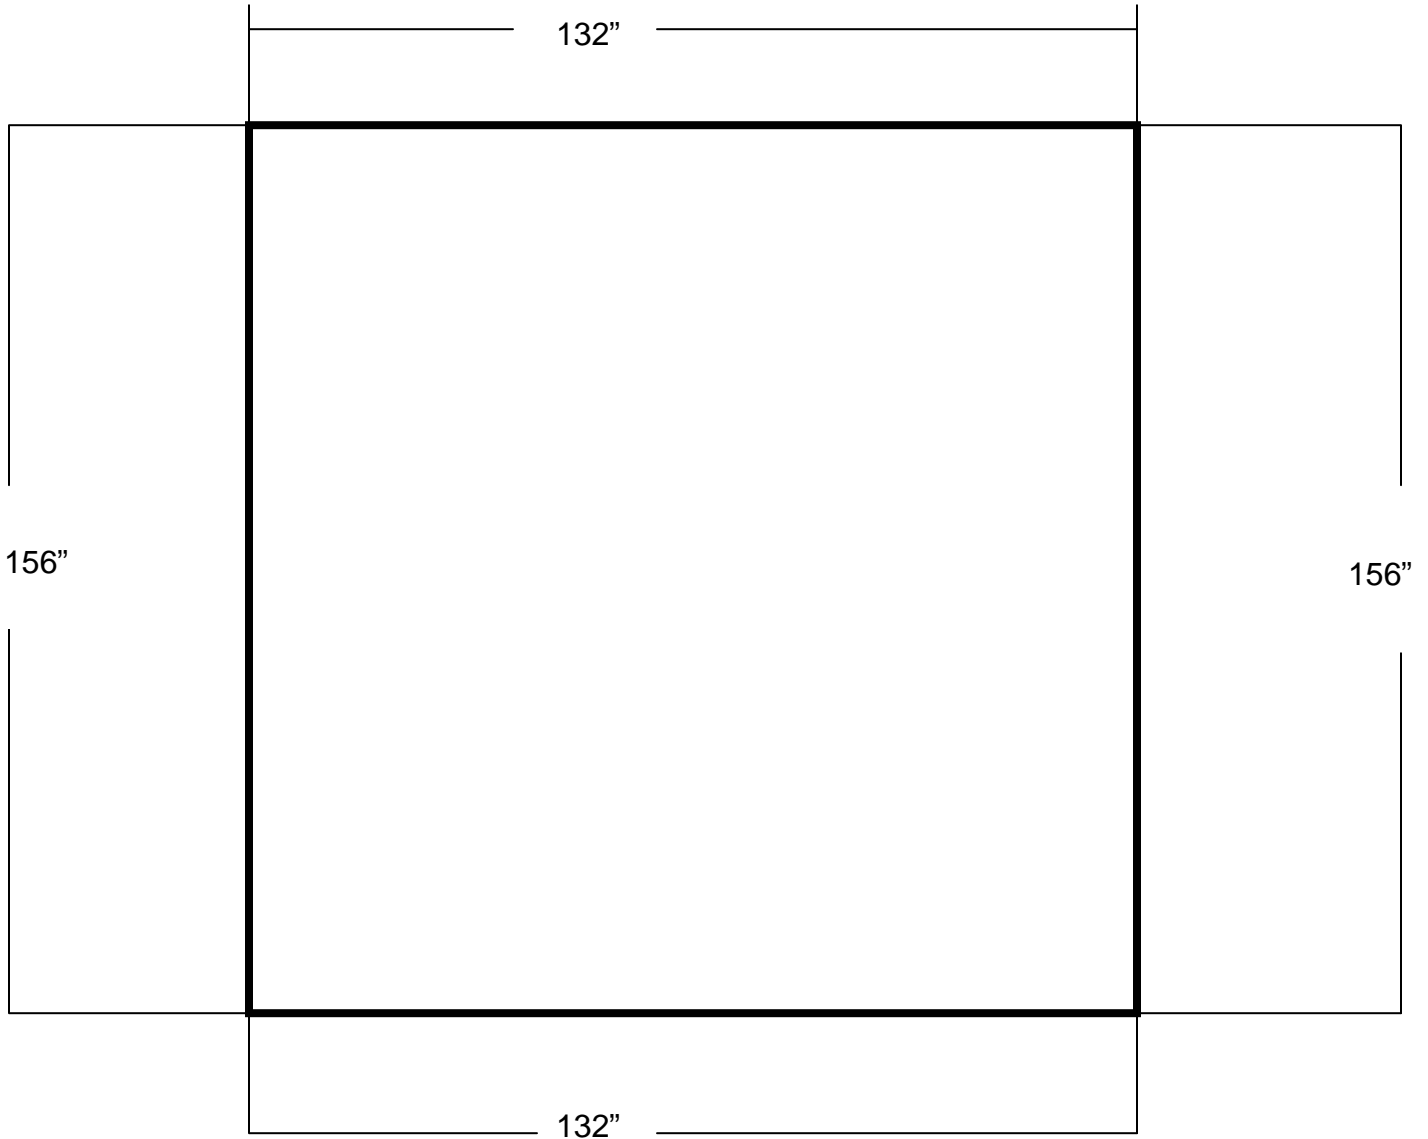

1. Draw a birds-eye view / top view of the walls of your kitchen. “see example”
2. Measure every wall left corner to right corner and record measurements in inches. “see example”
3. Measure openings such as doors, windows, hallways etc. Record measurements in inches. “see example” **Please measure on the outside edges of trim & window casings.**
4. Please measure your ceiling height from floor to ceiling. “see example”

Important: The measurements that you are taking will not be final. Your designer will be responsible for final measurements. This is just the first-step to get the best start in designing your dream kitchen.

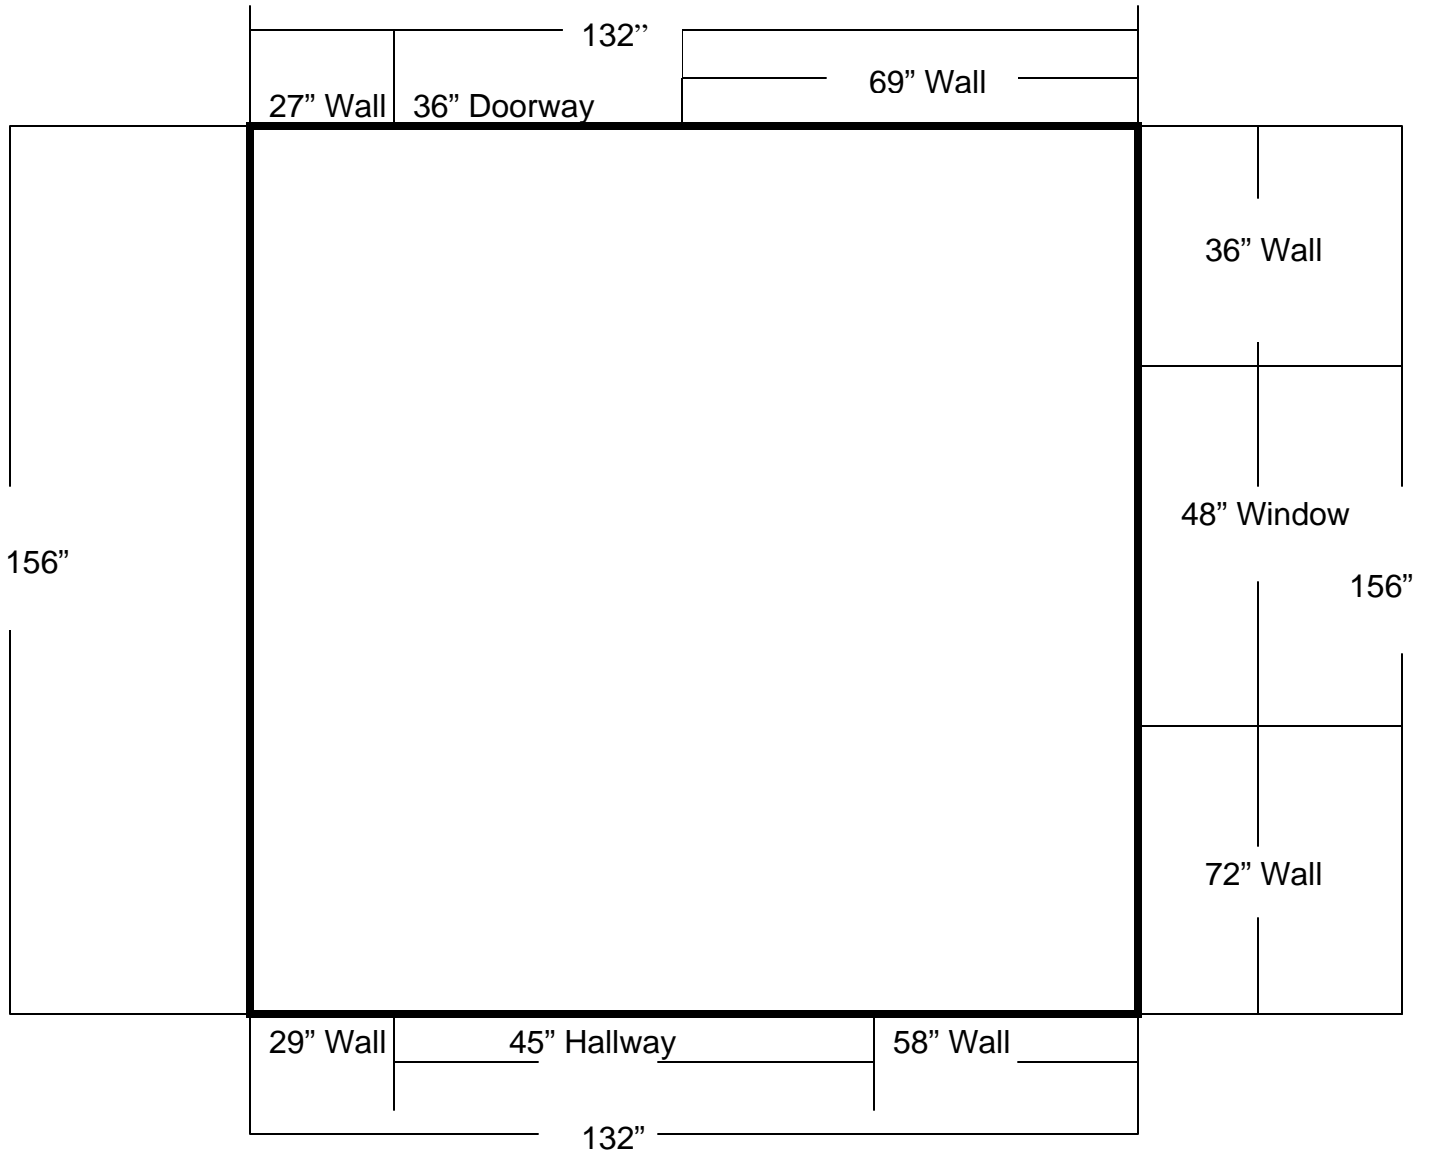

1. Draw a birds-eye view / top view of the walls of your kitchen.

2. Measure every wall left corner to right corner and record measurements in inches.

3. Measure openings such as doors, windows, hallways etc. Record your measurements in inches. **Please measure on the outside edges of trim & window casings.**

4. Measure your ceiling height from floor to ceiling.
